Smart City

Ong Innovations

The Smart City for Clean Energy experience is available for Windows Mixed Reality, HoloLens, and VR Headsets. You'll find a bustling city with several zones showcasing solar power, wind power, and even a geothermal power plant. These zones include educational content and media, such as pop-up holographic videos that provide valuable information for people of all ages! Users can activate a data globe hologram that can be in the middle of a room or office to dive deeper into the world of 3D visualization. Visit our website or scan the QR code to experience the Smart City today!
